

INSTRUCTIONS IN CASE OF BED BUGS OCCURRENCE

- if bedbugs are found, an immediate entry in ISKaM defect log is required, it will be done by the accommodation provider without delay
- remove the bedding from the mattress, pillow, and the blanket
- clean and empty the space under and on top of the bed, the shelves, all drawers, wardrobes, and other pieces of furniture; after a thorough inspection, place all of the items (temporarily) in the bathroom or the room hallway/connecting hallway between the rooms
- dispose of all paper boxes and paper bags by throwing them away in the dormitory bins
- do not leave any food in the room outside the fridge area
- pick up special plastic bags at the reception desk, put all textiles (including bedding) in them, and store them in the bathroom or the room hallway/connecting hallway between the rooms.
- if there are items left in the room by previous occupants, it is necessary to remove them and throw them away in the bins located outside the dormitory building
- the room, except for the contents of the fridge, must be in the same condition as when you just moved in
- unfortunately, due to capacity reasons, it is not possible to move to another room, so it is necessary to follow the procedure described here in its entirety
- all textiles must be washed at a minimum of 60 °C outside the laundry rooms of the SKM MU halls of residence: [public laundry machines brno - Hledat Googlem](#)
- after the washing is finished, proof of the washing must be provided to the local accommodation management (a document/receipt you received at the washhouse you used)
- the luggage must also be cleaned using a steam cleaner
- you can only return to your room after a period of time, which will be communicated individually before the chemical spray is carried out
- after the disinsection has been carried out, the floors/other treated areas cannot be swept or mopped/wiped for a period of 4 weeks
- if the previous steps are not taken, the chemical spray will take effect only temporarily for several weeks, and the problem will reoccur
- for this reason, maximum cooperation is required
- in the event of failure to comply with the above steps, a futile arrival of the pest company will be charged
